1. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 9 "a quick connection means" is indefinite since " a quick connection means" was already claimed on line 8, so it is unclear whether a new connection means is referred to or the previous connection means was referred to. Such could be rectified by reference to first and second quick connection means.

On line 10 "the power supply means" has no antecedent basis.

In claim 8, line 1 it is unclear which "quick connection means" is being referred to;

On lines 3-4 a pair of conductors of the quick connection means is said to have "the stud conductor", but this is indefinite since the stud conductor is said to be part of the terminal in the means connecting to the mains in claims 6 and 7.

In claim 9, line 2 "the stud" has no antecedent basis.

In claim 11, lines 6-7 "a quick connection means " is unclear since the same means is claimed twice.

In claim 15, lines 5-6 it is unclear which "quick connection means" is being referred to.

In claim 19, line 1 it is unclear which "quick connection means" is being referred to, and on lines 3-4 "the pairs of conductors each comprising the stud conductor" is indefinite since it was previously stated in claim 17 that the stud conductor is part of a body of the means connecting to the mains, not part of the quick connection means.

In claim 20, line 2 "the stud" has no antecedent basis.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Odachowski, Sisselman, DeLuca, Fawcett, Belano, Hetherington, Webb, Goldstein(273), Goldstein(314), Messenger and Hall disclose detector power source connecting systems.

3. Claims 1-23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A. Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-Th from 6:00 to 3:30.
